

TESTIMONIAL

This was a great class! Lots' more info from it than I imagined I would. I've been looking for a good note buying class & that was it. Detailed info on every step of the process, things to watch out for, acquiring your team, analyzing the note & then our options if we do acquire the note. Michele does a great job of making sure we're following the laws & also genuinely trying to help a borrower who would like to stay in their home & will work at it. (And she also teaches us how to deal with people who think they can try to take advantage of us.) She gives us lots of her tricks/techniques that she uses & also shares the people she uses around the country in her own business.
A great class & I highly recommend it!
